Aircraft Management by Asia Aviation Company

ASIA AVIATION COMPANY PTE. LTD.

Asia Aviation Company Aircraft Management

Asia Aviation Company (AAC) is driven by an absolute commitment to safety, service, quality and privacy. This is achieved with our custom-designed aircraft management system and process which have been refined for over more than 15 years.

A Strong and Dynamic Synergy of Services

- A complete aircraft operations and asset management solution for aircraft owners with the highest standards of safety, technical knowledge, tailored solution and service.
- Expertly equipped to efficiently manage the multitude of details surrounding ownership and operations. Asia Aviation Company will maximise the value of an owner's aircraft asset, allowing them to enjoy the benefits of their aircraft without the day to day challenges of safe, effective aircraft management and operation.
- A personalized approach to aircraft management, each aircraft management package is individually tailored to meet the unique needs that each owner and aircraft demand at any location the owner chooses.
- Each management account has its own manager being the single point of contact for all issues, and is directly accountable to each aircraft owner and also has the authority to respond immediately to any questions or concerns.
- AAC has established a "Direct Account System" to provide additional financial controls for our clients. A dedicated account is set up for each client, into which the clients funds their operating expenses. Invoices will be issued for the funds deposited into each individual account. The funds available will only be used for the payment of the client's aircraft operating expenses and will never be co-mingled with Asia Aviation Company's operation or other client's funds.
- Safety and service reviews are conducted before every flight. Every possible element is checked and re-checked and then monitored throughout each mission.
- Asia Aviation Company has the availability to enrol our clients' aircraft not only onto a Part 135 Air Operating Certificate but also an Australian Air Operating Certificate, enabling the aircraft to generate third party charter revenue.
- Asia Aviation Company is among the first to utilize the Singapore private aircraft register for clients' aircraft.

- Asia Aviation Company represents many years of business jet management and is positioned to provide the highest levels of safety, service, quality and privacy.
